## CAREER OBJECTIVE

Utilizing my career as a product manager and software engineering manager to deliver value as a product manager in New York City or remote.

## WORK EXPERIENCE

### Product Manager

#### 3DNavigation

📅 April, 2020 - current

- Oversee technical development of a 3D input device to develop a new 3D hardware peripheral
- Responsible for all technical aspects of the project to ensure project remains technically robust
- In charge of technical research and development to explore new physical approaches
- Interfacing with designer to ensure design remains aesthetic and attractive
- Collect user feedback to ensure customer needs are met
- Named Technical Director of U.K. company in recognition of contribution to product development

### Software Engineering Manager

#### EnlitenPath

- Helped build the software from scratch based on initial idea to a working product
- Worked with full development team to deliver on schedule
- App has launched in both Play Store and App Store to market test and get customer feedback

### Manager

#### Google, via Tech Mahindra

- Managed human judgment team overseeing the work of 15 individuals for Google to deliver accurate assessments for training ML algorithms
- In charge of ensuring team meets Google's requirements. Gave training and set up tracking system with a colleague to enable full team utilization
- Interfaced with Google engineers to ensure delivery met all requirements and address any quality errors

### Scrum master

#### Very Creatives

- Manager of engineering and product development for solution built in Ruby on Rails to deliver product improvements and iteration
- Led daily and weekly Scrum meetings, and helped design a user validation system to improve customer value
- With the team, helped design and ship a new wallet functionality for improving customer satisfaction and retention
